BrightStars

SCHOOL PLATFORM GUIDE
EDITION 2026 · V2.23

FOR PROPRIETORS, HEADS & SCHOOL BOARDS

One platform. Every school *its own.*

Entrance exams, admissions, results, report cards, attendance, fees, online payments, the school store, the library and parent updates. All of it in one place, under your school's own name, in your own colours, on your own web address.

Admissions to graduation

BUILT FOR NIGERIAN SCHOOLS

WELCOME

A calmer way to run a school.

Brightstars Academics is a complete school management platform built for Nigerian primary, junior and senior secondary schools. It replaces the spreadsheets, receipt books, notice boards and phone calls a school runs on with **one connected system**. A mark a teacher enters becomes a report card a parent opens. A payment the bursar records becomes a receipt on the parent's phone within moments.

This guide explains what the platform does, how each part works, and why schools choose it over spreadsheets, paperwork and other school software.

4

Portals in one: **staff, students, parents** and entrance **candidates**

15+

Connected modules, from **entrance exams** to the **school store**

100+

Named permissions, so each person sees **only what their job needs**

19

Ready-made staff roles, from **Head Teacher** to **Store Keeper**

255

Standard entrance questions included, so **exams can run on day one**

1

Private database for **each school**. Never shared with another school

0

Brightstars logos on your portal. **Your brand only**

24/7

Access on phone, tablet or computer. **Installs as an app**

18 Getting started 20

19 Questions schools ask 21

DOES THIS SOUND FAMILIAR?

Running a school shouldn't feel like running after paper.

Most schools are held together by spreadsheets, notebooks and phone calls. It works until term ends, exam day arrives, or a parent asks a simple question.

Results live in spreadsheets

Marks are typed, retyped and added up by hand. One wrong cell and a child's grade is wrong. Nobody is sure which copy is the latest.

Receipts written by hand

Books run out, handwriting is hard to read, and "did we ever receive this payment?" takes an afternoon to answer.

Parents keep phoning

"Are the results out?" "What do I still owe?" The same questions every term, and every answer costs someone's time.

Exam day is a scramble

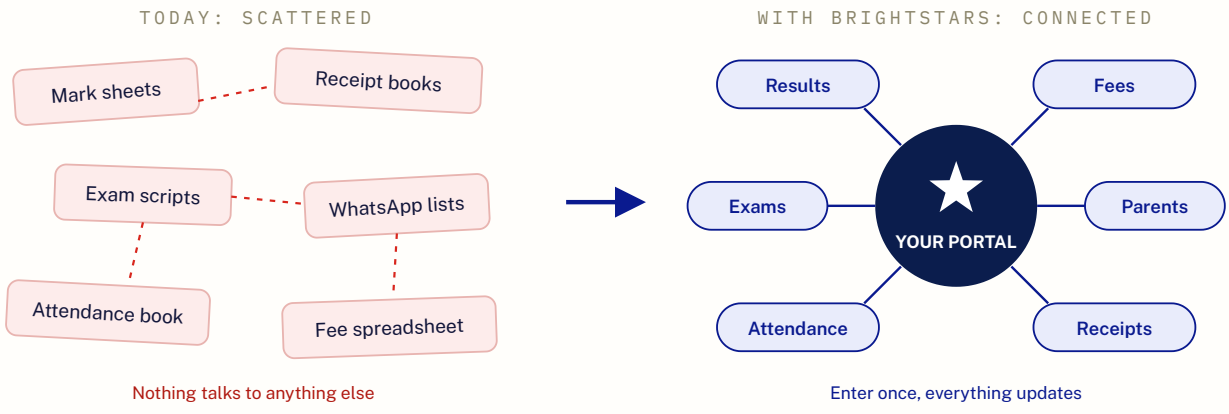

Printing papers, invigilating, marking by hand, ranking on a calculator, and hoping no script gets lost.

Everyone can see everything

When one login opens every record, a mistake or a curious visitor can reach children's information they should never see.

Software that isn't yours

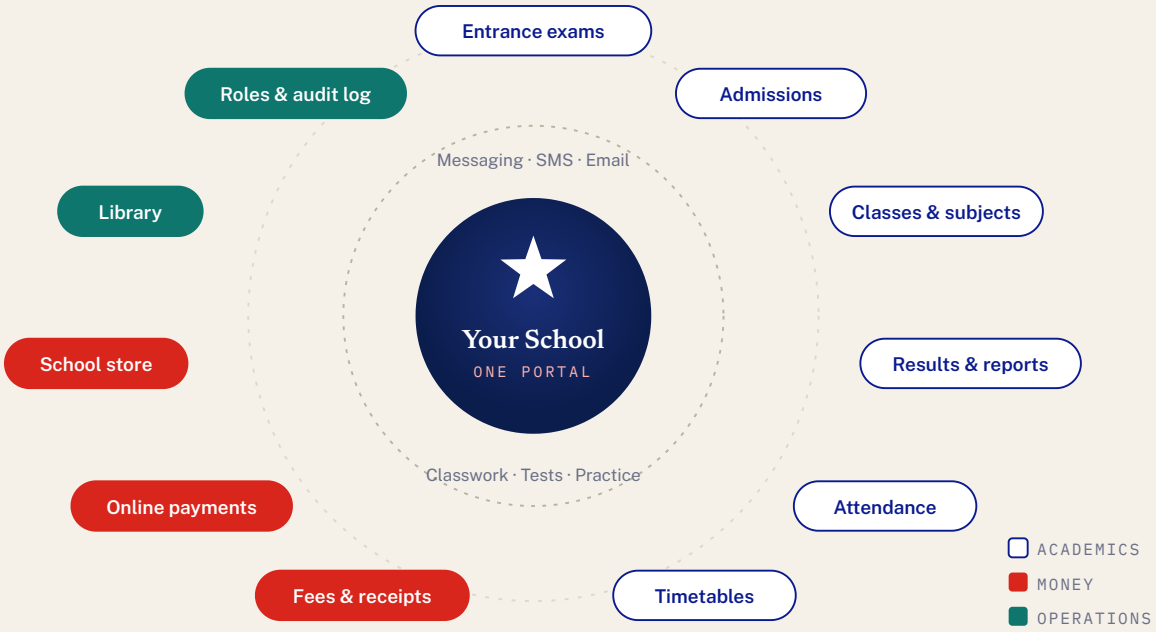

Generic systems carry someone else's name and colours. Your parents want to see *your* school.

WHAT YOU GET

Everything a school runs on, in one place.

Not eight separate tools that don't talk to each other, but one system with two workspaces, **School Portal** and **Entrance Examination**, and a portal of its own for every person in the school community.

Staff portal

Proprietor, head, teachers, bursar, librarian and office, each seeing only their own menu.

Student portal

Assignments, tests, exams, practice, timetable, attendance, results and report cards.

Parent portal

Every child in one place: fees, results, report cards, attendance, messages and the store.

Candidate portal

Entrance candidates sign in, sit timed papers and see their result once the school releases it.

WORKSPACE 1

School Portal

The everyday running of the school: students, parents, teachers, classes, subjects, attendance, academics, timetables, report cards, promotion, finance, the store, the library and settings.

WORKSPACE 2

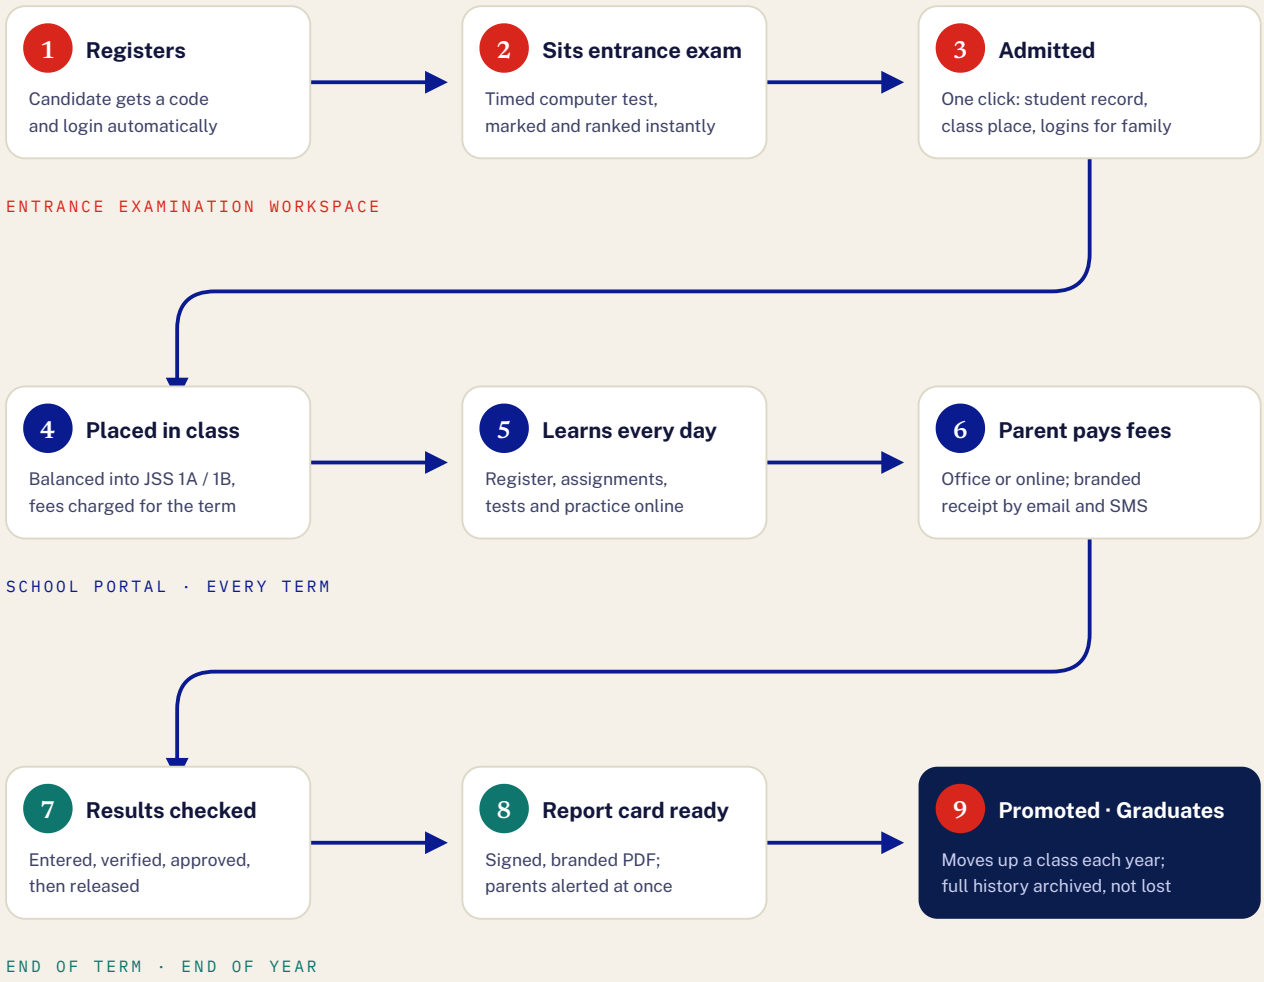

Entrance Examination

Everything for admissions season: candidates, question banks, exam configuration, results by subject, rankings, admissions and the public practice page.

HOW IT ALL FITS TOGETHER

A student's journey, start to finish.

Follow one child through the platform. Each step feeds the next automatically, so nothing is typed twice and nothing falls through the cracks.

> The admitted candidate becomes a real student with a class, a login, a fee account and a parent account in one action. No re-typing names into a second system.

Hours back every term

Marking, ranking, adding up results, writing receipts and building report cards are done by the system, not by staff after hours.

One version of the truth

Every screen, card and receipt is worked out from the same records, so the numbers can never disagree with each other.

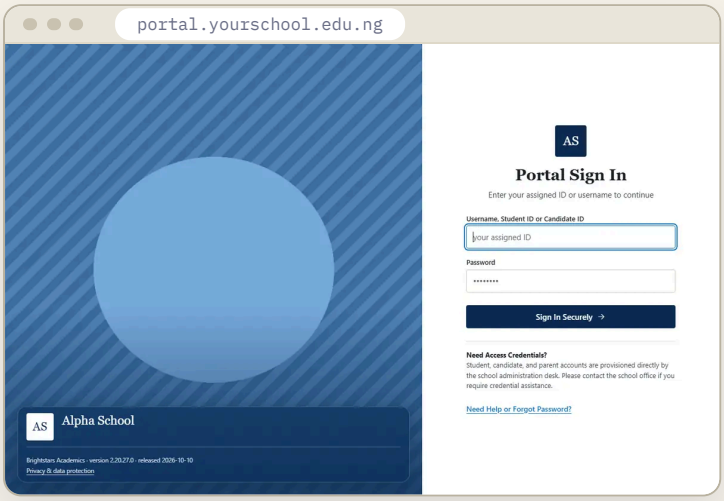

Families in the loop

At steps 6 and 8, and whenever work or fees are set, parents are told automatically. Nobody has to remember to send a message.

YOUR SCHOOL, YOUR NAME

It looks like your school, because it is.

Many platforms make every school look the same, with the vendor's logo in the corner. Brightstars works the other way round. Parents and students see **your** name, logo, colours and photographs on every page, every receipt and every report card. The Brightstars logo never appears on your portal.

The school's own sign-in page, with its logo, name and up to eight school photographs fading one into the next.

- **Your own web address,** live the moment your school is created, such as `yourschool.brightstars`…. Use your own domain (for example `portal.yourschool.edu.ng`) whenever you're ready.
- **Your logo, name, motto and tagline** on the portal, report cards and receipts.
- **Your two brand colours** on menus, headers, buttons and the sign-in page. A colour too light to read is refused automatically, so the portal always stays legible.
- **Up to eight photographs** of your school on the sign-in page.
- **Messages from your own accounts.** Email and SMS go out under your school's name, so parents know who is writing.
- **Your own numbering.** You decide how admission numbers and candidate codes look, for example `ABC/2026/0143`.

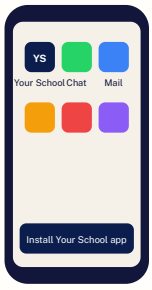

THREE SCHOOLS, ONE PLATFORM

Greenfield College

Royal Crest Academy

Your School

Each school appears in its own colours, on its own address. Sample names.

Installs as an app

Parents, students and staff can install the portal on a phone, tablet or computer. The app icon is **your** logo and the app name is **your** school. No app-store listing needed.

EVERYWHERE IT MATTERS

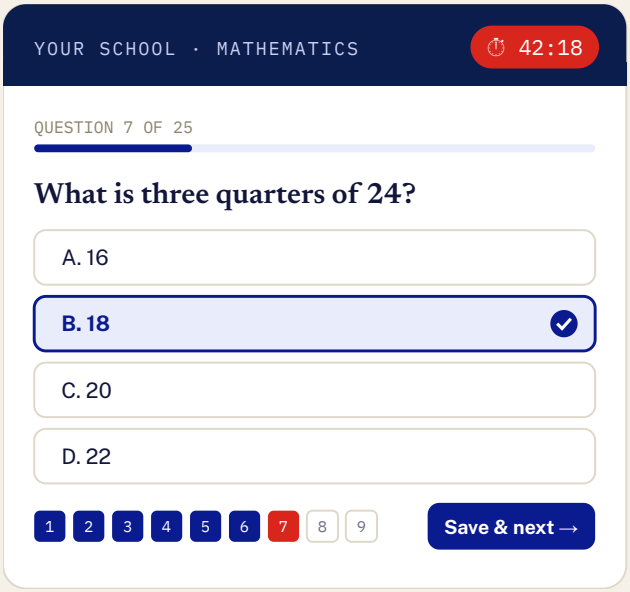

Your identity on every document

- Sign-in page
- Every menu
- Report cards
- Receipts
- Exam timetable PDF
- Emails & SMS
- Installed app
- Candidate results

ENTRANCE EXAMINATIONS

Admissions day without the paperwork.

Candidates sit their papers on a computer with a countdown clock. When they finish, every paper is already marked and the ranking is already done. No scripts to collect, no marking marathon, no calculator.

What a candidate sees: one question at a time, a server-kept clock, and a map of answered questions.

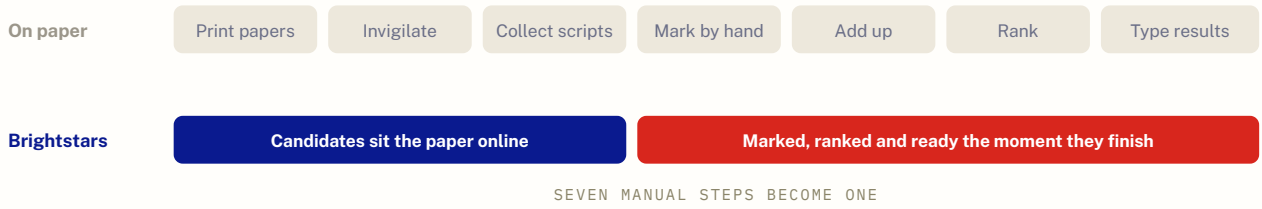

- **Marked instantly.** No arithmetic mistakes and no lost scripts. Rankings by subject and overall are ready the moment the last candidate finishes.
- **Fair by design.** Each candidate gets the questions in a different order. The clock is kept by the server, not by the candidate's device, so nobody can stop time.
- **Nothing lost mid-exam.** Every answer is saved the moment it is chosen. If power or the network drops, the candidate carries on exactly where they were.
- **Start with ours, or bring yours.** Every school starts with **255 standard questions** (Mathematics, English and General Knowledge for Year 7/JSS 1 and SSS 1), checked by an independent reviewer. Import your own banks whenever you like.
- **SSS departments.** SSS 1 candidates choose Science, Art or Commercial when they register.
- **Exams can't be changed after they're sat.** Each attempt keeps its own copy of the questions, and banks can be locked during a live exam.
- **Retakes when needed,** granted by authorised staff, and results exported to CSV.

A free practice link that markets your school

Families visit your school's own practice page with no sign-up, choose the class they're aiming for, and practise. Questions come from last year's paper or a practice bank you set. The paper about to be sat is never shown. Every family who practises meets your school's brand first.

```
yourschool…/entrance-practice
→ Year 7 / JSS 1
→ Year 10 / SSS 1
```

ENTRANCE EXAM DAY, BEFORE AND AFTER

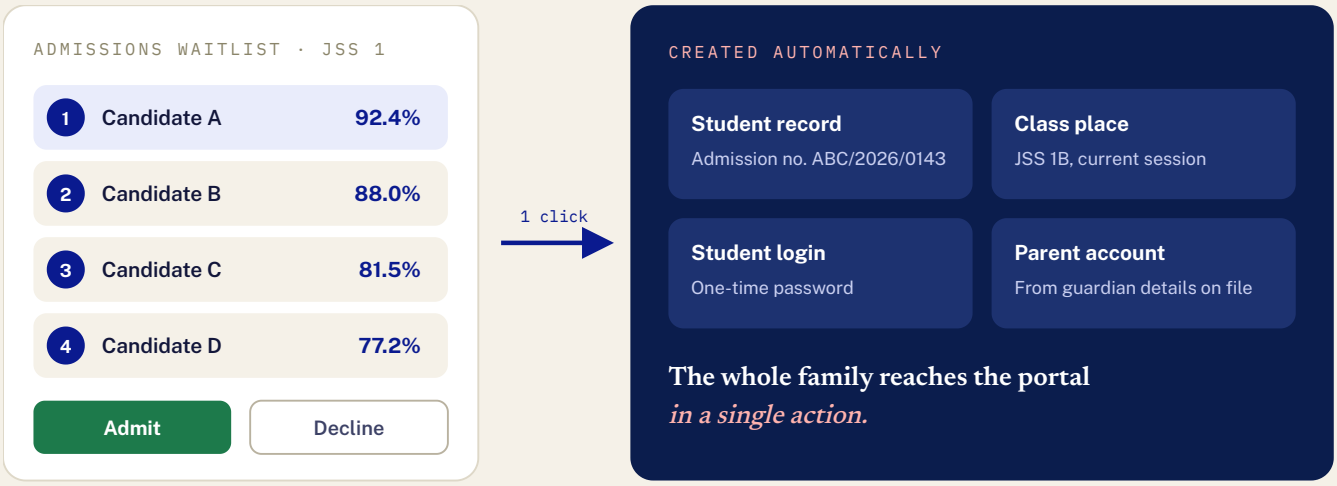

SEVEN MANUAL STEPS BECOME ONE

ADMISSIONS & CLASS PLACEMENT

From ranked waitlist to enrolled student in one decision.

Every candidate who sits at least one paper joins a waitlist ranked by overall percentage. Your admissions officer admits or declines from there, and one click creates everything a new student needs.

Decisions stay private

Admitting a candidate doesn't show them a score. An admin must release the result before the candidate sees their outcome or new login.

The right person decides

Only the Admissions Officer role sees the waitlist by default, and it can be limited to one entry level. Admitting is final. Declining can be undone.

Balanced classes, automatically

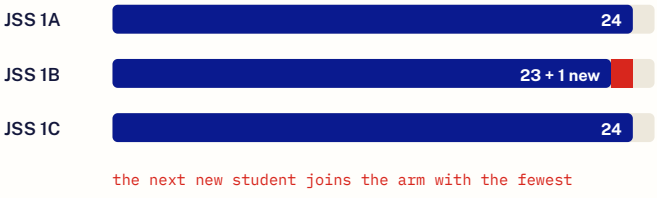

Split JSS and SSS classes into arms such as JSS 1A, 1B or SS 1A (Science). New students go to the arm with the fewest students.

Class transfers with approval

A class teacher can ask to move a student to another arm, or in SSS to another department. Nothing changes until the receiving class teacher (or the head) approves it.

Three ways in, one record

Students arrive by entrance exam, by registering one at a time, or by bulk import from your existing spreadsheets. All three produce exactly the same record.

Even class sizes without spreadsheets

Placement happens automatically when a class is split, when a student is added and when a candidate is admitted. In SSS, an arm tied to a department only takes students from that department.

RESULTS & REPORT CARDS

From marks to report card, with nobody chasing.

Teachers enter marks. The system adds them up, holds each result until the right person has checked it, and builds the report card the moment a child's term is complete.

CLASS TEACHER'S COMMENT
A focused and diligent term. Keep it up.

Class teacher

Head Teacher

Illustration of a term report card, available as a page and as a PDF.

- **Continuous assessment (40) plus exam (60),** added up the same way for every child, with grade and remark.
- **Different people check each step,** so mistakes are caught before a parent ever sees them.
- **Never incomplete.** A card appears only when every result for the term is released, so it never shows a missing mark.
- **Signed and branded:** your logo and colours, the class teacher's comment and signature, the head's signature, the class average, trait ratings and next-term date.
- **A whole class in one PDF** to print, or each card alone.
- **Parents told for you** by email, SMS and in-app alert the moment the card is ready.

THE GRADING KEY PRINTED ON EVERY CARD

FOR THE PROPRIETOR AND HEAD

The whole school at a glance.

Open the portal and the Overview answers the questions a school leader asks every morning. How are we doing this term compared with last? Who has no class teacher? How many results are ready to release? How full is the register?

The Overview of a demonstration school ("Alpha School"). All names and figures are sample data.

Term against term

Average score, attendance, marks released and work set, each compared with the previous term, with ▲ or ▼ showing which way it moved.

What needs attention

Results waiting to be released, classes with no class teacher and unallocated payments are flagged, so nothing is left sitting.

Every class in one table

Students, average, attendance, a results bar and the top student for every class, plus the attendance trend and enrolment by section.

✓ **A setup checklist guides new schools.** "Set up your school" walks you through classes, subjects, students and fee items, and ticks each step off by reading your own data. You always know what's left to do.

DAY TO DAY

Teaching, attendance and timetables.

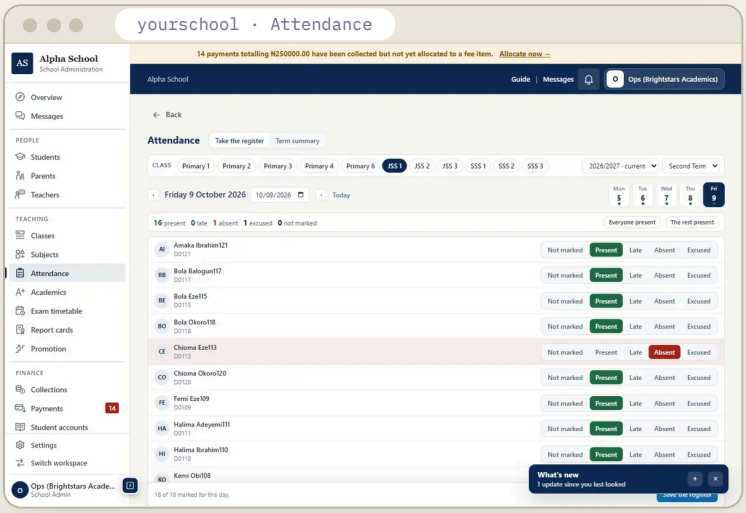

The ordinary business of a school day, done in minutes instead of hours, and visible to the families who care about it.

01
Assignments
Teachers set work, students answer online, and marks come back without anyone re-typing them.

02
Class projects
Written or quiz-style, for one student or a whole class, graded with the same care.

03
Tests & exams
The same timed, auto-marked engine as the entrance exam, used for everyday classwork.

04
Practice
Retake as often as you like, in a new order every time. Never counted towards grades.

Taking the register: one tap per child, or "Everyone present" and adjust. Demo data.

Attendance in moments

- Present, late, absent or excused for the whole class, once a day.
- Term summaries per class, with percentages.
- Parents and students see the day-by-day record on their own dashboard.

Timetables, released together

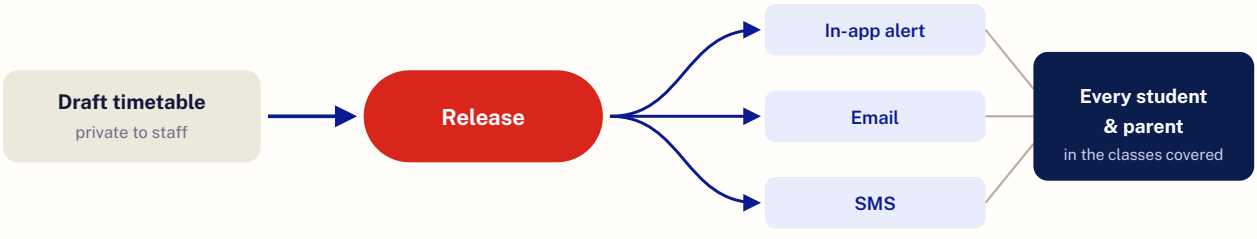

- Build the exam or test timetable as a private draft and edit it freely.
- Release it once and every affected student and parent is told by **email, SMS and in-app alert** at the same moment.
- Families download it as a PDF or print it.

Built for Nigerian schools
Crèche, Nursery, Primary, JSS and SSS, with Science, Art and Commercial departments. Subjects can be set for each department.

Early years done right
Crèche and Nursery pupils don't need logins. Teachers record scores and parents still see fees, results and report cards.

Nothing lost or counted twice
Answers are saved when a student presses Save & Next, so a dropped connection or stray tap never loses or doubles a response.

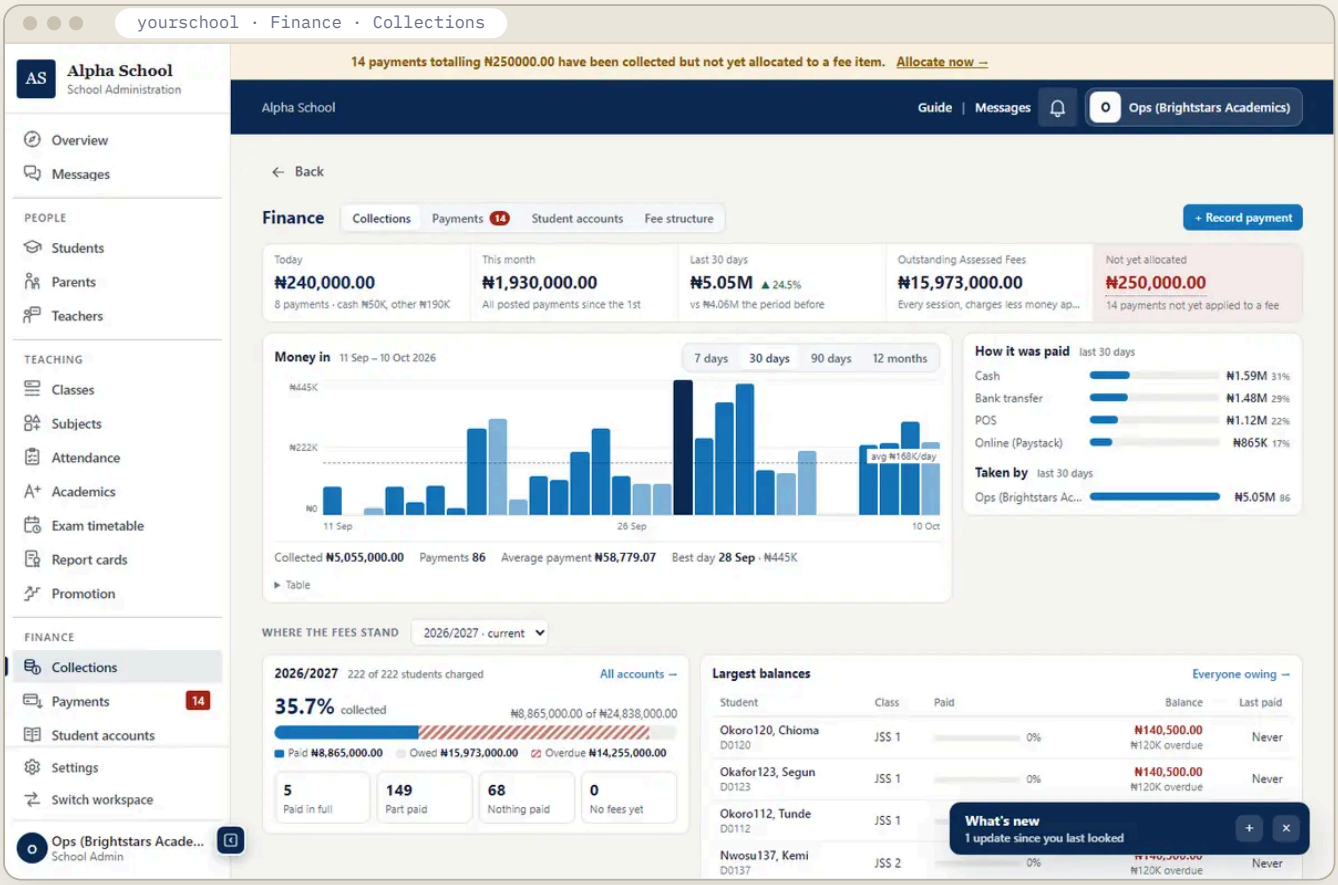

ONE RELEASE, EVERYONE TOLD

FINANCE

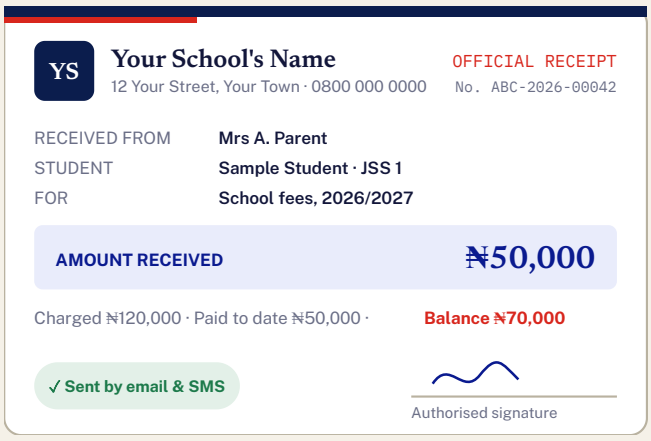

Always know who has paid, and who hasn't.

Set fees once by class and term, charge students in a few clicks, and watch collections come in live. Every payment produces a receipt in your colours that reaches the parent by itself.

Collections for a demonstration school: money in by day, payment method mix, how much of the session's fees is collected, and the largest balances. Sample figures.

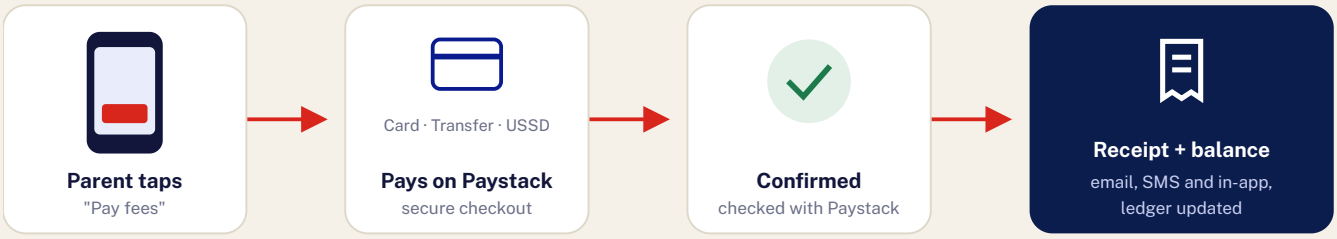

- **Fees set once, by class:** tuition, uniform, transport and more, per class and term.
- **Balances always to hand:** paid, part paid or unpaid, per fee and per child, including arrears from earlier sessions.
- **Cash, transfer, POS or online,** all recorded in one ledger.
- **Mistakes are corrected, not hidden.** A wrong payment is voided with a reason and stays on record.
- **Unallocated money is flagged** until it's applied to a fee.

PAY FEES ONLINE

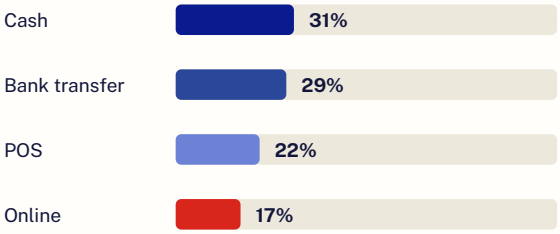

Parents pay from their phone, straight into your account.

Connect your school's own Paystack account and parents can pay any amount up to what they owe by card, bank transfer or USSD. The money goes **directly to your school**. Brightstars never holds it.

NO ONE IN THE OFFICE HAS TO DO ANYTHING

EXAMPLE: HOW A DEMONSTRATION SCHOOL WAS PAID, LAST 30 DAYS

Sample data from the demo school shown on the previous page. Every channel lands in the same ledger and produces the same receipt.

Safe by design

- **Your own Paystack account.** No shared platform account and no middleman holding your money.
- **Never trusted from a browser.** Every payment is confirmed by asking Paystack directly, even if the parent closes their phone mid-payment.
- **A double-tap never charges twice.** Repeated clicks return to the same checkout.
- **Your keys are encrypted** and never shown again once saved. Only the School Admin can connect the account.
- **Pay one fee or several at once,** and buy from the school store too.

One fee or all at once

Parents can pay a single fee, part of a balance, or several fees together in one checkout.

Confirmed even if they close the app

Paystack also notifies the school directly, so a payment is recorded even if the parent closes their browser first.

Same receipt, same ledger

An online payment looks exactly like one recorded in the office, with the same branded receipt and balance update.

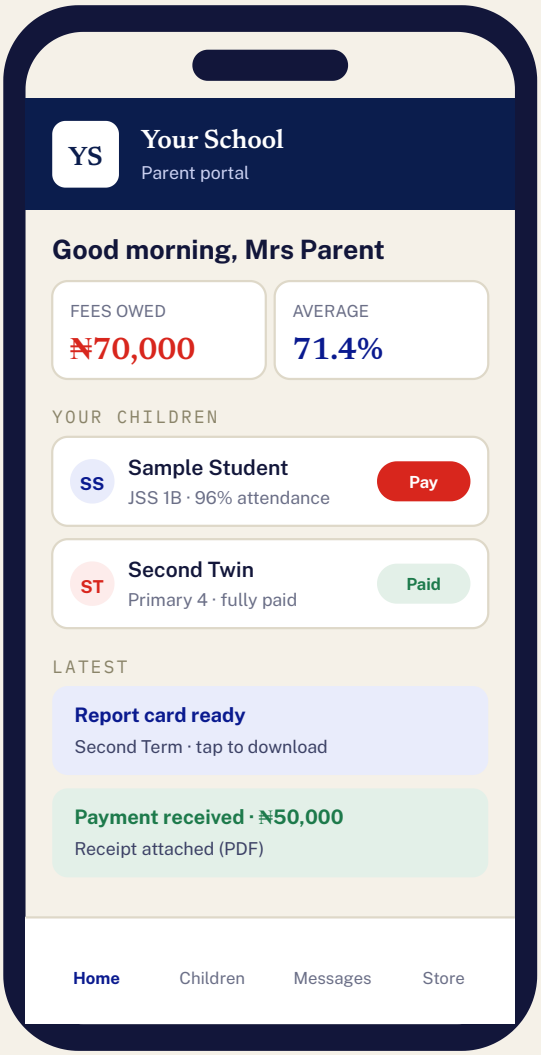

Less cash in the office. Faster collections.

Parents who can pay from their phone at 9pm don't need to queue at the bursar's window at 9am.

FOR FAMILIES

Parents stay informed without phoning the office.

One parent login covers every child. Fees, results, report cards, attendance, timetables, messages and the store are all on their phone, in your school's colours.

What parents get

- Every child in one table, showing what each owes, their average and attendance.
- Results and report cards the moment they're released, ready to download.
- Fee account by session, with receipts and online payment.
- Attendance history and the exam timetable.
- Two-way messages with the school.
- The school store, with collection texts when an item is picked up.

What students get

- Assignments, projects, tests and exams with due dates and scores.
- Unlimited practice tests that never count against them.
- Their own timetable, attendance and report cards.

SENT AUTOMATICALLY, IN YOUR SCHOOL'S NAME

When...	In-app	Email	SMS
A payment is recorded	•	• + PDF	•
A report card is ready	•	•	•
A timetable is released	•	•	•
A new fee is charged	•	•	•
New school work is set	•	•	–

SMS is used only where it matters, which keeps your SMS credit costs down.

> "Are the results out?" "What do I still owe?" The answers are on the parent's phone before they think to call.

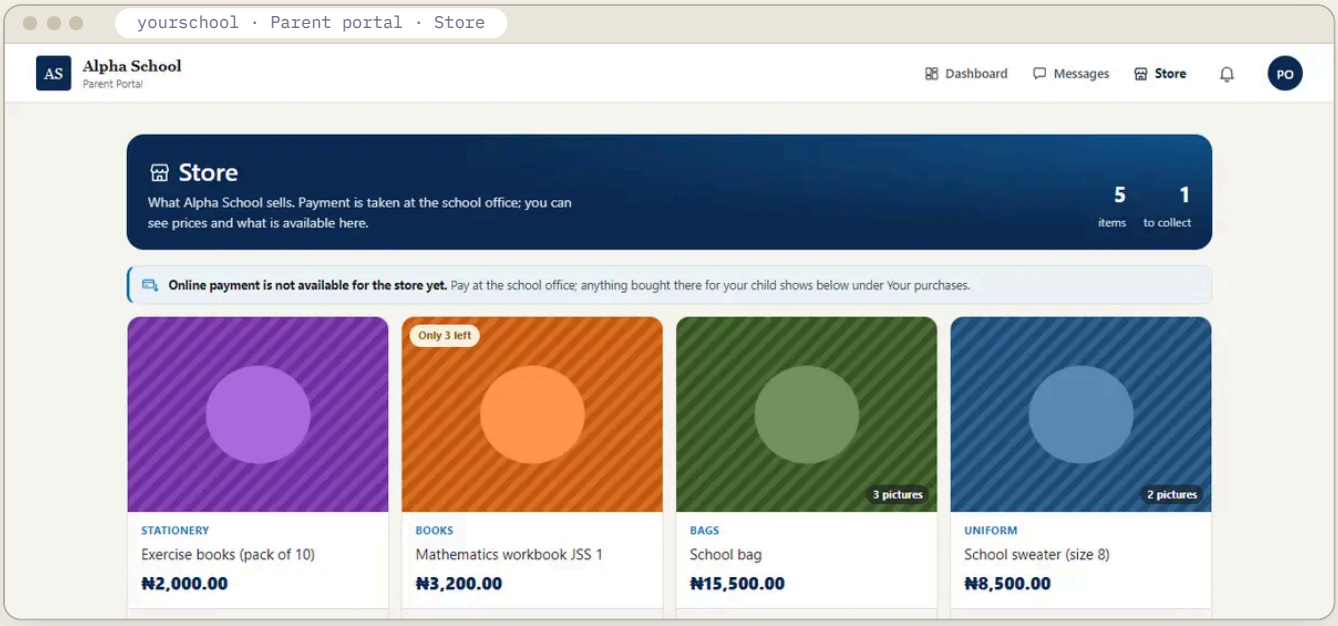

Messages, not missed calls

Parents and staff exchange messages inside the portal, and a conversation the school starts reaches the parent by SMS too.

BEYOND THE CLASSROOM

The school store and the library, included.

Uniforms, books, bags and stationery, sold and tracked in the same portal. The library knows every book, copy and loan.

The store as a parent sees it, with prices, stock and "only 3 left" or "sold out" labels. Demo data and placeholder pictures.

School store

- Inventory with prices, stock levels and up to three pictures per item.
- Parents browse and buy for any child, online where the school accepts it.
- Cash, transfer and POS sales recorded at the counter, with receipt.
- Stock goes down by itself. Low-stock and sold-out items are flagged.
- Hand-over records who collected the item and texts the parent.
- Sales this month vs last, weekly sales and best sellers on the Overview.
- A ready-made **Store Keeper** role.

Library

- A catalogue of every book and each of its copies.
- Lend to a student or a member of staff in a couple of clicks.
- See what's out, who has it, and what's overdue.
- Record returns so nobody has to remember who has what.
- A ready-made **Librarian** role.

Why it matters: fewer lost books, less cash handled informally, and money from the store that is visible and accounted for.

STAFF, ROLES & ACCOUNTABILITY

Everyone sees what their job needs, and nothing more.

No single "give them access" switch. Every sensitive action has its own named permission, access follows your school's chain of authority, and every important action is recorded.

YOUR CHAIN OF AUTHORITY, BUILT IN

Ready-made staff roles, each describing what it can do and how many permissions it carries. Demo data.

PRIVATE BY DESIGN

Children's information deserves real protection.

Many school systems keep every school's records in one big shared database, separated only by a label. Brightstars is built differently. **Every school gets its own private database and its own private files.** One school can never see another's records.

Walled off, not filtered

Students, results, fees and photographs live in your school's own database, not as tagged rows in a shared table that one bug could leak.

Careful with passwords

New accounts start with a one-time password that must be changed. Repeated wrong guesses are slowed. Changing a password signs out every device.

Secrets encrypted

Your email, SMS and Paystack credentials are encrypted at rest, never shown again once saved, and kept out of activity logs.

Parents see only their children

A parent's login opens their own children's records and nothing else. A login from one school doesn't work at another.

Exams survive hiccups

Answers are saved as they're given and time is kept by the server. A restart doesn't throw a candidate out.

NDPR-aligned

A published data-protection statement aligned with Nigeria's NDPR, linked from every school's sign-in page for parents and staff.

Archived, never lost. Students who leave are archived, not deleted. Their full history, class placements and results by term stay available to the School Admin and can be restored at any time.

ALREADY USING SOMETHING?

Here's what changes when you move.

You may already have school software, or a mix of spreadsheets and habits. Here is how Brightstars compares with what schools commonly use today.

	Paper & spreadsheets	Typical shared school software	Brightstars Academics
Look and feel	○ Whatever the office prints	◐ Vendor's name and colours	● Your name, logo, colours, address and app icon
Where records live	○ Files, books, laptops	◐ One shared database with other schools	● Your school's own private database
Entrance exams	○ Paper scripts, hand marking	◐ Often a separate tool or add-on	● Built-in CBT, instant ranking, free practice page
Admissions	○ A list re-sorted by hand	◐ Students re-typed after the exam	● Ranked waitlist, admit in one click, family logins created
Results	○ Formulas and retyping	◐ Entry, often without sign-off	● Entered, verified, approved, released
Report cards	○ Built one child at a time	◐ Generic template	● Branded, signed, with class averages, ready on release
Fees & receipts	○ Receipt books and a ledger	◐ Receipts printed on request	● Branded receipts sent by email and SMS by themselves
Online payment	○ Bank slip brought to office	◐ Often via the vendor's account	● Straight into your own Paystack account
Telling parents	○ Calls and notice boards	◐ Manual broadcasts	● Automatic email, SMS and in-app, from your accounts
Who sees what	○ Whoever holds the file	◐ A few broad admin levels	● 100+ permissions, class-scoped, fully logged
Store & library	○ Separate notebooks	◐ Rarely included	● Both included, linked to parents and payments
Nigerian structure	◐ Adapted by hand	◐ Often foreign defaults	● Crèche to SSS, departments, Naira, BulkSMS Nigeria
Getting started	○ Never really "set up"	◐ Weeks of configuration	● Live address on day one, spreadsheet import, guided checklist

● fully covered ◐ partly or sometimes ○ not covered. The first two columns describe common situations, not any particular product. Your current setup may already do some of these things well.

WHY SCHOOLS CHOOSE US

Ten reasons your school needs Brightstars.

1. **It's your brand, not ours**
   Parents see your school on every screen, receipt and report card, and as the app on their phone.

2. **Your data is truly yours**
   A private database for your school alone, exportable in full whenever you need it.

3. **Admissions to graduation in one system**
   From entrance exam to report card, nothing is typed twice.

4. **Fees collected faster**
   Live balances, automatic receipts and online payment straight to your account.

5. **Fewer phone calls**
   Parents get results, receipts and timetables automatically.

6. **Results you can trust**
   Four-step sign-off before anything reaches a parent.

7. **Accountability built in**
   Precise permissions and an activity log answer "who did this?".

8. **Made for Nigerian schools**
   Crèche to SSS, departments, Naira, Paystack and local SMS.

9. **A marketing tool too**
   A public entrance-practice page brings prospective families to your brand.

10. **Always improving**
    Regular releases, announced in-portal with a "What's new" card for each audience.

A BETTER DAY FOR EACH PERSON

Proprietor & head

- Whole school at a glance
- Control who does what
- Know who did what, and when
- Sign once, for every report card

Teachers

- Set work and quizzes online
- Marks add up on their own
- Register in moments
- See only their own classes

Bursar & office

- Record a payment in a minute
- Receipts sent automatically
- Every balance, always current
- Far fewer parent calls

Parents & students

- Everything on their phone
- Pay fees from anywhere
- Practise without limits
- Message the school directly

Stand out to families at admission time.

Parents now expect results, receipts and updates on their phone. Brightstars gives your school a modern portal under its own name.

Book a walkthrough →

GETTING STARTED

From "yes" to your first class online, in four steps.

No servers to buy and no software to install. Your portal works in any modern browser, and we set it up with you.

1
We create your school
name, motto, logo, colours and photographs

2
Your address goes live
immediately; add your own domain any time

3
You set up your school
classes, subjects, staff, roles and fee items

4
Everyone signs in
students, parents and staff choose their own password

Bring your records with you

Move from spreadsheets in three guided steps. Every import is checked line by line. Bad rows are reported by line number and the good rows still go in.

1 · Students	with logins and parent details
2 · Enrolment history	past classes and sessions
3 · Past results	so records stay complete

A checklist that guides you

The "Set up your school" card ticks off each step as you complete it.

- Review your classes (pre-seeded for you)
- Add subjects
- Enrol students
- Set up fee items
- Open the school store (optional)

A staff guide with pictures

A plain-language guide inside the portal, with screenshots and a link to every page it describes.

"What's new," for everyone

Staff, parents and students each see a short note about improvements that matter to them.

Exams from day one

The standard entrance papers are set up in one click, so your first entrance exam can run immediately.

ALL YOU NEED

No new hardware

A device and a browser

Any phone, tablet, laptop or desktop with a modern browser.

Your existing records

Student lists and past results in a spreadsheet, if you want to bring history across.

Your branding

Logo, colours, motto and a few photographs of the school.

QUESTIONS

Things schools ask us.

Do our staff need to be technical?

No. Staff use ordinary web pages, and each person sees only the screens that matter to their job. We set up your school with you, and you can change your colours, logo and roles yourself afterwards.

Can we use our own web address?

Yes. Your school gets an address the moment it's created, and it keeps working. To use your own domain as well, you add one simple record with your domain provider and we connect it.

Will messages come from us or from Brightstars?

From you. Once you connect your school's accounts, emails and texts are sent from them. The Brightstars logo is never shown on your portal.

What if something goes wrong on exam day?

Every answer is saved the moment it's chosen, and the clock is kept by the server. A candidate mid-paper carries on where they were, even after a restart. Staff can also grant a retake.

Do practice tests count towards grades?

Never. Students can practise as often as they like, the questions come in a new order each time, and nothing they do in practice is recorded.

Can parents pay online?

Yes, once you connect your school's own Paystack account. Parents pay any amount up to what they owe, by card, transfer or USSD, straight to your account. Office payments work exactly the same either way.

Can different staff have different access?

Yes. You choose what each role can do and can limit a teacher to their own classes and subjects. Nobody can give someone more access than they have themselves.

Can we bring our own questions and records?

Yes. Import your own question banks, and bring students, enrolment history and past results in from spreadsheets.

Does it work on phones?

Yes. Every portal works on phones, tablets and computers, and can be installed as an app with your school's logo.

What happens to students who leave?

They're archived, not deleted. Their sign-in stops, but their full record stays available and can be restored. Parents keep access to their fee account.

Can a school be paused?

Yes. A school can be suspended and reactivated independently. Its data is untouched and it returns exactly where it left off.

Who owns our data?

You do. Your records sit in your school's own database, and a complete export of your database and files can be produced at any time.

What does it cost?

Talk to us. We'll look at the size of your school and what you need, and give you a clear answer with no hidden extras.

Still have a question?

We'll answer it on a walkthrough, using your school's own name and colours.

Talk to us →

NEXT STEP

See it running for *your* school.

Tell us about your school and we'll show you a walkthrough of how it would look and feel, with your name, your colours and your classes. Your portal's address is live the moment your school is created.
